

## TT Regins

Introducing the new TT Regins—a font with a royal character!

TT Regins is a Scottish modern serif. Striking contrast and sharp triangular serifs give this font a stern and commanding character, while refined forms, enlarged lowercase letters, and slightly condensed, static proportions add grace to its design.

TT Regins includes three subfamilies with varying degrees of contrast: Display, Text, and the intermediate Subhead. In the Display subfamily, designed for large inscriptions, the contrast is most pronounced, and the character is expressed most vividly. In Text, the contrast is muted for improved readability, ensuring the font works flawlessly in running text. Subhead can be used for accents and headlines. Each style is optimized for comfortable use within its corresponding point size range: the optical size axis allows for adapting the contrast and the degree of design.

We paid special attention to the cursive italics, which are striking and dynamic. They are slanted at 14° and stand out clearly in text due to their 'true italic' forms. The serifs at the top remain sharp, while those at the bottom become semi-rounded—this creates an effect of gliding and unified motion within the text.

TT Regins includes stylistic sets that can be used to make the font's character smoother. The typeface's capabilities are also expanded by two variable fonts for working with different weights and optical sizes in the upright and italic styles. We've also added an atmospheric, themed set of icons featuring chess and playing cards.

TT Regins is highly versatile and functional: different styles can be used for different tasks, creating font pairs within a typeface. It will look harmonious in fashion magazines, in the brand identities of museums and cultural institutions, on perfume packaging, and in the design of historical exhibitions. With its help, it is easy to create a sense of elitism and sophistication.

#### TT Regins includes:

• 38 styles: 18 uprights, 18 italics, and 2 variable fonts

- 1,277 glyphs in the upright styles
- 1.285 in the italics
- 34 OpenType features
- · Support for over 230 languages

TT Regins — a true diamond in the world of type!

TypeType company was founded in 2013 by Ivan Gladkikh, a type designer with a 10 years' experience, and Alexander Kudryavtsev, an experienced manager. Over the past 10 years we've released more than 75+ families, and the company has turned into a type foundry with a dedicated team.

Our mission is to create and distribute only carefully drawn, thoroughly tested, and perfectly optimized type-faces that are available to a wide range of customers.

Our team brings together people from different countries and continents. This cultural diversity helps us to create truly unique and comprehensive projects.
